About Us

AE Plastics is a full service signage company, established in 1976. Our scope of work includes initial planning and design, manufacture, project management and installation. All manufacturing is done in one centralised production facility in Wadeville, Gauteng. Our modern 4000m² factory is well equipped with state of the art equipment and machinery.

We produce a wide range of high quality signage custom built to suit your specific needs, whether it is for a single signage application or a full roll out program. Over many years our team has built up the skills required to consistently produce quality signage, manufactured to specification and delivered on time. We work extensively throughout Southern Africa, as well as other African countries.
