Welcome to Africa Plastics

22 Africa Plastics, an independent operation based in South Africa, has been at the forefront of the Plastic Injection Moulding Industry in South Africa since the early 1980's. Our reputation as leaders in the moulding of Nylon, Polycarbonate, PVC, Noryl, Styrene, Polypropylene, Polystyrene and Acrylic is founded on many years of experience. From the moment you first contact us, our staff will ensure that you receive all the information you need to make the right decisions about your mould, material selection, colours, product design, development and packaging and any other aspects of your injection moulding project.

Assisting You From Design to the Finished Product

We are small enough to give you the attention you need to take your project from the drawing board to the finished product. Yet we are large enough to provide all the services you need from an injection moulding company.
