

We manufacture and repair pallets, crates and boxes.

Company Profile

Afripallet is here to service all your timber packaging needs. An initial assessment will include design, improvement of current products and cost saving suggestions.

The products and services offered include pallets, bins and crates manufactured to customer specifications as well as standard sizes. Also offered are industrial as well as Graded Structural Timber.

The main production site is in Benoni and is situated close to the N12 and N17 highways. Production at this site consists of the manufacture of new pallets, the repair of pallets for FMCG companies, the manufacture of crates, the heat treatment of export packaging materials and the drying and storage of timber and pallets in our 15 000sq meter facility. All waste is further processed or utilised within the factory premises. The Company has vast experience of doing pallet repairs on customer sites as well as at our two factories.

In the Western Cape the factory is situated in Stellenbosch close to the N2, R300 and R102 highways. The facility provides exactly the same and manufactured products as above.

Afripallet is certified to Heat Treat timber and pallets for export to ISPM15™ standards in both Benoni and Stellenbosch. we are also SATAS certified for structural timber grading and most importantly FSC™ COC FSC-C113000.

The profiles of all our current customers are blue chip manufacturing companies operating on continuous production 365 days per annum. These sectors include glass, ceramics, and pallet rental in the FMCG environment, fruit export, beverages and steel industry.
