

Industries

Automotive

Air Liquide supplies industrial, specialty gases and associated equipment to help the industry improve process, production and reduce emissions.

Beverages

Air Liquide's food grade gases are critical in carbonation, inerting, packaging and preservation for soft drinks, craft beers and wines.

Chemicals

Air Liquide is a long-term partner of the chemicals industry, supplying industrial and specialty gases and energy solutions

Construction

Air Liquide provides safe and reliable gas solutions for your construction needs for cutting, welding and concrete applications.

Craftsmen

Air Liquide offers a range of safe, reliable and easy-to-use gas solutions for craftsmen of many trades.

Glass

Air Liquide provides glass manufacturers with solutions to improve their competitiveness and environmental footprint.

Environment

We help industries meet environmental regulations and requirements while reducing their environmental impact.

Food

Air Liquide provides food grade industrial gases for applications such as freezing, chilling, inerting, MAP and others.

Metal Fabrication

Meeting diverse needs of the metal fabrication industry.

Metals

Air Liquide is a leading supplier of industrial gases used in metal applications from oxy-combustion to degasification

Oil and Gas

Air Liquide is committed to fueling growth in the oil and gas industry.

Pharmaceuticals and Biotechnology

Air Liquide's safe, reliable high-purity gas solutions for pharma and biotech.

Pulp and Paper

Air Liquide's gases and related services help boost production of the pulp & paper industry, reducing costs and environmental impact.

Renewable Energy

Air Liquide supplies sustainable energy solutions for the transportation, materials handling and electrical power sectors.

Research and Analysis

Air Liquide offers reliable gas and chemical solutions for public and private institutions, laboratory services and industrial research centers.
