PRODUCT INFORMATION

Air-o-wrap protective foam wrapping offers low cost surface protection without scuffing, scratching or sticking to delicate surfaces. It is an ideal protective wrap or interleaving layer with tough tear strength properties. Due to its unique cellular structure Air-o-wrap is both extremely flexible and durable providing excellent insulation and resistance to moisture penetration, protecting contents from moisture damage in humid climates as well as abrasion and impact damage in transit. The Uniform surface of Air-o-wrap further guarantees to protect polished surfaces from abrasions, scratching and marking often left by traditional bubble mediums as well as being a cost effective option.

Available in a range of sizes, from 1 to 5mm and in roll widths of 1250mm and 1500mm.
