What We've Been Up To This Week

VEHICLE SIGNAGE

Vehicle wrapping is the art of covering a vehicle in a vinyl "sticker". This type of product is primarily used to display company names/logo's or for promotional items being advertised by companies. We can offer either a full wrap, as well as partial wraps and basic decals.

BANNERS

The production and manufacture of banners are done in-house, at our Strijdom Park factory. These banners can be used at shows, marketing events, launches and much much more...

All of our banners are printed on top grade PVC, and for our indoor branding solutions such as roll-up banners, the bases and mechanisms are made of aluminium or steel.

PRINTING MACHINES

Using top quality machinery, materials and inks, we have become well known for our superior quality, as well as our reliable and efficient service. We offer printing across a broad spectrum of media, from vinyls, PVC's and paper, through to a full on-site application service, for items such as ABS, Correx and Chromadek.

OUTDOOR SIGNAGE

Having become leaders in the outdoor signage arena, there are very few signs that we have not made... From basic boards, through to giant building wraps, and everything in between, AKA Signage is the preferred choice when it comes to the manufacture and installation of signage.

GAZEBO'S

A Gazebo is an excellent multi-function branding item, as not only does it provide shade for you at your event, it also provides a practical branding opportunity, that is visible from a distance, and is also easy to assemble and move. Contact us today should you require a Gazebo

LIGHT BOXES

Light Boxes come in various shapes and sizes, from as little as an A4 display box on your counter, through to custom shaped boxes & pylons etc – your creativity is our limit. We manufacture our light boxes in-house, including all tubes, fittings, print etc, with power to the edge of the box. We offer both indoor and outdoor lightbox solutions.

VEHICLE MAGNETS

Vehicle magnets are a cost-effective short-term branding solution, ideal for either drivers who change cars often, or for clients who use their vehicle during the week as a work vehicle, but on weekends as a private vehicle. Our standard size is 500 x 300mm, but we can custom to any size required.

RESIN DOMING

Resin Doming adds class to what would otherwise be a high quality sticker. This is most commonly used to enhance a product or brand, such as machine and equipment names, as well as name badges and many other applications.

SHOP SIGNAGE

We cover a wide range of shop signage, from general vinyl wraps to lift and escalator advertising. We also cater for events and shows

POSTERS

At AKA Signage, we can print posters of any size, all in high quality full colour – quantities ranging from 1 to infinity. We also offer an in-house lamination service, should you wish to protect your prints.
